Number of AMT Taxpayers (millions). Baseline: 0.2

(1) Calendar year. Baseline is the law currently in place as of January 18, 2024. Includes following proposals: (1) modifications to child tax credit (does not include impact of earnings "lookback"); (2) extension of rules for treatment of certain disaster-related personal casualty losses; and (3) exclusion from gross income for compensation for losses or damages resulting from certain wildfires. Also includes portion of the following provisions that apply to individuals or pass-through entities: (1) deduction for R&E expenditures; (2) extension of 100-percent bonus depreciation; and (3) increase in limitations on expensing of depreciable business assets. Does not include any corporate or excise tax provisions. For more information on TPC's baseline definitions, see

http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

Proposal: 0.2

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2023 dollars): 20% \$29,800; 40% \$58,000; 60% \$104,600; 80% \$192,700; 90% \$281,000; 95% \$409,600; 99% \$978,900; 99.9% \$4,344,100.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0323-2).

(1) Calendar year. Baseline is the law currently in place as of January 18, 2024. Includes following proposals: (1) modifications to child

tax credit (does not include impact of earnings "lookback"); (2) extension of rules for treatment of certain disaster-related personal

casualty losses; and (3) exclusion from gross income for compensation for losses or damages resulting from certain wildfires. Also includes

portion of the following provisions that apply to individuals or pass-through entities: (1) deduction for R&E expenditures; (2) extension of

100-percent bonus depreciation; and (3) increase in limitations on expensing of depreciable business assets. Does not include any corporate

or excise tax provisions. For more information on TPC's baseline definitions, see

http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2023 dollars): 20% \$21,000; 40% \$40,500; 60% \$70,200; 80% \$118,300; 90% \$5245,400; 99% \$526,500; 99% \$526,500; 99% \$526,500; 99% \$526,500; 99% \$526,500; 99% \$526,500; 99% \$526,500; 99% \$506,500; 99\% \$506,50

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes. (5) For income categories for which the baseline tax burden is negative, a positive percent change in average federal tax indicates a net increase in federal subsidies, and a negative percent change indicates a net

decrease in federal subsidies.
