Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 1006-2).
Number of AMT Taxpayers (millions). Baseline: $3.7 \quad$ Proposal: 3.7
(1) Calendar year. Baseline is 2008 current law assuming extension and indexation for inflation of the 2007 AMT patch. Proposal provides a tax rebate of up to $\$ 600$
( $\$ 1,200$ for married couples filing a joint return) plus $\$ 300$ per dependent. The rebate would be limited by 15 percent of earnings (defined as wages plus self-
employment income, if positive). The rebate would be phased out at a rate of 5 percent of AGI in excess of the thresholds for the child tax credit phaseout ( $\$ 75,000$ for singles, $\$ 110,000$ for couples).
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
