Number of AMT Taxpayers (millions). Baseline: 5.0 Proposal: 4.0

- (i) impose a 20 percent rate on capital gains and qualified dividends for taxpayers in the top two tax brackets; (j) limit value of itemized deductions to 28 percent.
- (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <a href="http://www.taxpolicycenter.org/TaxModel/income.cfm">http://www.taxpolicycenter.org/TaxModel/income.cfm</a>
- (3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
- (4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
- (5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

Number of AMT Taxpayers (millions). Baseline: 5.0 Proposal: 4.0

(1) Calendar year. Current policy extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. The proposal would: (a) extend the higher EITC credit value for families with 3 children and higher phase-out thresholds for married couples; (b) modify the saver's credit making it equal to 50% of the first \$500 of retirement savings (\$1,000 for couples) and fully refundable; (c) create automatic 401(k)s and IRAs; (d) extend the American Opportunity Tax Credit; (e) extend the \$3,000 child tax credit refundability threshold; (f) raise the child and dependent care tax credit phase-out threshold to \$85,000; (g) change the threshold for the 36-percent tax bracket to \$250,000 less the standard deduction and two personal exemptions for married couples filing jointly and \$200,000 less the standard deduction and one personal exemption for single filers, indexed for inflation after 2009; (h) set the thresholds for the personal exemption phase-out and limitation on itemized deductions to \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009;

- (i) impose a 20 percent rate on capital gains and qualified dividends for taxpayers in the top two tax brackets; (j) limit value of itemized deductions to 28 percent.
- (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

 $\underline{http://www.taxpolicycenter.org/TaxModel/income.cfm}$ 

- (3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
- (4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
- (5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

- (i) impose a 20 percent rate on capital gains and qualified dividends for taxpayers in the top two tax brackets; (j) limit value of itemized deductions to 28 percent.
- (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <a href="http://www.taxpolicycenter.org/TaxModel/income.cfm">http://www.taxpolicycenter.org/TaxModel/income.cfm</a>
- (3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
- (4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
- (5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

- (i) impose a 20 percent rate on capital gains and qualified dividends for taxpayers in the top two tax brackets; (j) limit value of itemized deductions to 28 percent.
- (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <a href="http://www.taxpolicycenter.org/TaxModel/income.cfm">http://www.taxpolicycenter.org/TaxModel/income.cfm</a>
- (3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
- (4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
- (5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

- (i) impose a 20 percent rate on capital gains and qualified dividends for taxpayers in the top two tax brackets; (j) limit value of itemized deductions to 28 percent.
- (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <a href="http://www.taxpolicycenter.org/TaxModel/income.cfm">http://www.taxpolicycenter.org/TaxModel/income.cfm</a>
- (3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
- (4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
- (5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

Note: Tax units with children are those claiming an exemption for children at home or away from home.

(1) Calendar year. Current policy extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. The proposal would: (a) extend the higher EITC credit value for families with 3 children and higher phase-out thresholds for married couples; (b) modify the saver's credit making it equal to 50% of the first \$500 of retirement savings (\$1,000 for couples) and fully refundable; (c) create automatic 401(k)s and IRAs; (d) extend the American Opportunity Tax Credit; (e) extend the \$3,000 child tax credit refundability threshold; (f) raise the child and dependent care tax credit phase-out threshold to \$85,000; (g) change the threshold for the 36-percent tax bracket to \$250,000 less the standard deduction and two personal exemptions for married couples filing jointly and \$200,000 less the standard deduction and one personal exemption for single filers, indexed for inflation after 2009; (h) set the thresholds for the personal exemption phase-out and limitation on itemized deductions to \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009;

- (i) impose a 20 percent rate on capital gains and qualified dividends for taxpayers in the top two tax brackets; (j) limit value of itemized deductions to 28 percent.
- (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

 $\underline{http://www.taxpolicycenter.org/TaxModel/income.cfm}$ 

- (3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
- (4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
- (5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.

(1) Calendar year. Current policy extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. The proposal would: (a) extend the higher EITC credit value for families with 3 children and higher phase-out thresholds for married couples; (b) modify the saver's credit making it equal to 50% of the first \$500 of retirement savings (\$1,000 for couples) and fully refundable; (c) create automatic 401(k)s and IRAs; (d) extend the American Opportunity Tax Credit; (e) extend the \$3,000 child tax credit refundability threshold; (f) raise the child and dependent care tax credit phase-out threshold to \$85,000; (g) change the threshold for the 36-percent tax bracket to \$250,000 less the standard deduction and two personal exemptions for married couples filing jointly and \$200,000 less the standard deduction and one personal exemption for single filers, indexed for inflation after 2009; (h) set the thresholds for the personal exemption phase-out and limitation on itemized deductions to \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009;

- (i) impose a 20 percent rate on capital gains and qualified dividends for taxpayers in the top two tax brackets; (j) limit value of itemized deductions to 28 percent.
- (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

 $\underline{http://www.taxpolicycenter.org/TaxModel/income.cfm}$ 

- (3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
- (4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
- (5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
