Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
Number of AMT Taxpayers (millions). Baseline: $1.2 \quad$ Proposal: 3.2
(1): Calendar year. Baseline is current law plus an AMT patch. Proposal would extend the 10, 25, and 28 percent statutory individual income rates; and would adjust the endpoint of the 28 percent bracket to be $\$ 250,000$ less the standard deduction and two personal exemptions for married couples, $\$ 200,000$ less the standard deduction and one personal exemption for singles, the threshold for heads of household would be the midpoint of the thresholds for married couples and singles; the dollar values would be indexed for inflation after 2009.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax
units. The breaks are (in 2009 dollars): $20 \% \$ 19,356,40 \% \$ 37,493,60 \% \$ 65,656,80 \% ~ \$ 111,659,90 \% ~ \$ 161,739,95 \% ~ \$ 226,402,99 \% ~ \$ 599,181,99.9 \% ~ \$ 2,727,123$.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Number of AMT Taxpayers (millions). Baseline: 1.2

## Proposal: 3.2

(1): Calendar year. Baseline is current law plus an AMT patch. Proposal would extend the 10,25 , and 28 percent statutory individual income rates; and would adjust the endpoint of the 28 percent bracket to be $\$ 250,000$ less the standard deduction and two personal exemptions for married couples, $\$ 200,000$ less the standard deduction and one personal exemption for singles, the threshold for heads of household would be the midpoint of the thresholds for married couples and singles; the dollar values would be indexed for inflation after 2009.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): $20 \% \$ 13,219,40 \% \$ 24,782,60 \% \$ 41,864,80 \% \$ 68,188,90 \% \$ 97,830,95 \% \$ 138,709,99 \% \$ 361,983,99.9 \%$ \$1,670,467.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
(1): Calendar year. Baseline is current law plus an AMT patch. Proposal would extend the 10,25 , and 28 percent statutory individual income rates; and would adjust the endpoint of the 28 percent bracket to be $\$ 250,000$ less the standard deduction and two personal exemptions for married couples, $\$ 200,000$ less the standard deduction and one personal exemption for singles, the threshold for heads of household would be the midpoint of the thresholds for married couples and singles; the dollar values would be indexed for inflation after 2009.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): $20 \% \$ 13,219,40 \% \$ 24,782,60 \% \$ 41,864,80 \% \$ 68,188,90 \% \$ 97,830,95 \% \$ 138,709,99 \% \$ 361,983$, 99.9\% \$1,670,467.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

| All | 30,543 | 100.0 | 75,737 | 15,130 | 60,607 | 20.0 | 100.0 | 100.0 | 100.0 |
| Addendum |  |  |  |  |  |  |  |  |  |
| 80-90 | 2,427 | 8.0 | 105,444 | 19,637 | 85,807 | 18.6 | 11.1 | 11.3 | 10.3 |
| 90-95 | 1,362 | 4.5 | 153,103 | 33,060 | 120,043 | 21.6 | 9.0 | 8.8 | 9.8 |
| 95-99 | 1,394 | 4.6 | 267,882 | 68,639 | 199,243 | 25.6 | 16.1 | 15.0 | 20.7 |
| Top 1 Percent | 434 | 1.4 | 1,396,961 | 455,493 | 941,468 | 32.6 | 26.2 | 22.1 | 42.8 |
| Top 0.1 Percent | 42 | 0.1 | 6,520,091 | 2,339,177 | 4,180,914 | 35.9 | 12.0 | 9.6 | 21.5 |

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older
(1): Calendar year. Baseline is current law plus an AMT patch. Proposal would extend the 10,25 , and 28 percent statutory individual income rates; and would adjust the endpoint of the 28 percent bracket to be $\$ 250,000$ less the standard deduction and two personal exemptions for married couples, $\$ 200,000$ less the standard deduction and one personal exemption for singles, the threshold for heads of household would be the midpoint of the thresholds for married couples and singles; the dollar values would be indexed for inflation after 2009.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
hp.//www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20\% $\$ 13,219,40 \% \$ 24,782,60 \% \$ 41,864,80 \% \$ 68,188,90 \% \$ 97,830,95 \% \$ 138,709,99 \% \$ 361,983,99.9 \%$ \$1,670,467.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
