(1) Ratio of AMT liability on Form 6251, lost credits, and the value of reduced deductions to cash income. Tax units that are dependents of other tax units are excluded from the analysis.

n/a: Insufficient data.

(2) Current policy assumes that all the temporary provisions in place for calendar year 2011 are extended, with the exception of the payroll tax cut. The AMT patch under current policy is the 2011 AMT patch which sets the AMT exemption amount for 2011 at \$48,450 for individuals and \$74,450 for married taxpayers filing jointly, indexes the exemption amount for inflation after 2011, and allows non-refundable personal credits against AMT liability.

(3) Tax units with negative cash income are excluded from the lowest income class. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>.

(4) Number of children is defined as number of exemptions taken for children living at home.
