(1) Calendar year. AMT taxpayers include those with AMT liability from Form 6251, with lost credits, and with reduced deductions

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. Includes both filing and non filing units but excludes those that are dependents of other taxpayers. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>.

(3) Income subject to tax for the regular income tax is taxable income; for the AMT it is AMTI net of the AMT exemption

(4) Amounts are in nominal dollars to facilitate comparison with AMT exemption amounts. For 2011, the AMT exemption is \$74,450 for married couples filing jointly and \$48,450 for single taxpayers. For 2012 and 2013, the corresponding exemption amounts are \$45,000 and \$33,750.

(5) The marginal tax rate for each return is calculated by adding \$1,000 to wages, recomputing income tax net of refundable credits, and dividing the resulting change in tax liability by 1,000.

(6) Marginal tax rates represent a simple average across individuals
