Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-7).

Number of AMT Taxpayers (millions). Baseline: 25.7

Proposal: 25.9

Note: Estimates assume that individuals pay down their mortgage in response to a smaller tax benefit for mortgage interest.

(1) Calendar year. Baseline is current law. Proposal limits mortgages eligible for the mortgage interest deduction to \$500,000 on primary residences only. We approximate the \$500,000 limit on mortgages with a limit on deductible mortgage interest of \$25,000.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): 20% 20801, 40% 40054, 60% 70916, 80% 122764, 90% 178595, 95% 252189, 99% 668398, 99.9% 3077636.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-7).

Note: Estimates assume that individuals pay down their mortgage in response to a smaller tax benefit for mortgage interest.

(1) Calendar year. Baseline is current law. Proposal limits mortgages eligible for the mortgage interest deduction to \$500,000 on primary residences only. We approximate the \$500,000 limit on mortgages with a limit on deductible mortgage interest of \$25,000.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% 14308, 40% 26767, 60% 45519, 80% 75099, 90% 108866, 95% 155063, 99% 404211, 99.9% 1887502.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
