Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 1006-1).

(1) Proposal includes extension of the 10 percent tax bracket and indexation of the bracket for inflation. Estimates are static and do not account for any potential microeconomic behavioral response. Official estimates from the Joint Committee on Taxation would likely show a somewhat smaller revenue loss.

(2) Fiscal-year revenue numbers assume a 75-25 split. The actual effect on receipts could differ.

(3) Baseline includes indexation of the AMT exemption at 2006 levels and allows personal credits against the AMT.
