Number of AMT Taxpayers (millions). Baseline:

3.7

Proposal:

3.7

(1) Calendar year. Baseline is 2008 current law assuming extension and indexation for inflation of the 2007 AMT patch. Proposal provides a tax rebate of up to \$400 (\$800 for married couples filing a joint return) plus \$200 per dependent. The rebate would be limited by 15 percent of earnings (defined as wages plus self-employment income, if positive). The rebate would be phased out at a rate of 5 percent of AGI in excess of the thresholds for the child tax credit phaseout (\$75,000 for singles, \$110,000 for couples).

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile breaks used in this table are (in 2006 dollars): 20% \$13,944, 40% \$26,887, 60% \$47,151, 80% \$83,902, 90% \$123,792, 95% \$174,283, 99% \$425,614, 99.5% \$663,650, and 99.9% 1,925,007.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
