Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

(1) Estimates are static and do not account for any potential microeconomic behavioral response. Official estimates from the Joint Committee on Taxation would likely show a somewhat different effect on revenue.

(2) Kids newly eligible for the refundable child credit includes all children potentially eligible for the child credit on returns claiming a non-zero value for the refundable child credit under the proposal but not in the baseline.

(3) Baseline is current law. Proposal extends the CTC provisions in EGTRRA, including the allowance of the credit regardless of AMT.

(4) Baseline is option 1. Proposal extends the unindexed earnings threshold of \$8,500 permanently, effective 01/01/11.

(5) Baseline is option 1. Proposal extends the unindexed earnings threshold to \$3,000, effective 01/01/11.

(6) Baseline is option 1. Proposal reduces the earnings threshold to \$0 and reduces the phase-in rate to 10 percent, effective 01/01/11.

(7) Baseline is option 1. Proposal reduces the earnings threshold to \$0 while keeping the phase-in rate of 15 percent, effective 01/01/11.

(8) Baseline is option 1. Proposal makes credit fully refundable regardless of tax liability or earnings, effective 01/01/11.

(9) Kids with increased refundable child credit includes all children potentially eligible for the child credit on returns claiming a non-zero value for the refundable child credit in the baseline and a larger value under the proposal.
