Source: IRS, Statistics of Income Division, Estate Tax Returns Study, Table 2: Selected Tax Computation Items, by State of Residence. September 2024

Notes: Detail may not add to total due to rounding.

\* Estimates should be used with caution because of the small number of sample returns on which they were based.

d = Data were deleted to prevent disclosure of individual taxpayer data. However, the data are included in the appropriate totals.

[1] Generally, an estate files a federal estate tax return (Form 706) in the year after a decedent's death. So, in 2022, most returns were filed for deaths that occurred in 2021, for which the filing threshold was \$11.7 million of gross estate. Because of filing extensions, however, some returns were filed in 2022 for deaths that occurred prior to 2021, for which filing thresholds were lower. There are also a small number of returns filed for deaths that occurred in 2022, for which the filing threshold was \$12.06 million.

[2] Includes U.S. territories, U.S. citizens domiciled abroad at their time od death, and a small number of returns for whom State of residence was unknown.

\* Estimates should be used with caution because of the small number of sample returns on which they were based.

d = Data were deleted to prevent disclosure of individual taxpayer data. However, the data are included in the appropriate totals.

[1] Generally, an estate files a Federal estate tax return (Form 706) in the year after a decedent's death. So, in 2020, most returns were filed for deaths that occurred in 2019, for which the filing threshold was \$11.40 million of gross estate. Because of filing extensions, however, some returns were filed in 2020 for deaths that occurred prior to 2019, for which filing thresholds were lower. There are also a small number of returns filed for deaths that occurred in 2020, for which the filing threshold was \$11.58 million.

[2] Includes U.S. territories, U.S. citizens domiciled abroad at their time od death, and a small number of returns for whom State of residence was unknown.

NOTE: Detail may not add to total due to rounding.

\* Estimates should be used with caution because of the small number of sample returns on which they were based.

d = Data were deleted to prevent disclosure of individual taxpayer data. However, the data are included in the appropriate totals.

[1] Generally, an estate files a Federal estate tax return (Form 706) in the year after a decedent's death. So, in 2017, most returns were filed for deaths that occurred in 2016, for which the filing threshold was \$5.45 million of gross estate. Because of filing extensions, however, some returns were filed in 2017 for deaths that occurred prior to 2016, for which filing thresholds were lower. There are also a small number of returns filed for deaths that occurred in 2017.

[2] Includes U.S. territories, U.S. citizens domiciled abroad at their time of death, and a small number of returns for whom State of residence was unknown.

NOTE: Detail may not add to total due to rounding.

\* Estimates should be used with caution because of the small number of sample returns on which they were based.

d = Data were deleted to prevent disclosure of individual taxpayer data. However, the data are included in the appropriate totals.

[1] Generally, an estate files a Federal estate tax return (Form 706) in the year after a decedent's death. So, in 2013, most returns were filed for deaths that occurred in 2012, for which the filing threshold was \$5.12 million. Because of filing extensions, however, some returns were filed in 2013 for deaths that occurred prior to 2012, for which filing thresholds were lower.

[2] Includes U.S. territories, U.S. citizens domiciled abroad, and a small number of returns for whom State of residence was unknown.

[1] Generally, an estate files a Federal estate tax return (Form 706) in the year after a decedent's death. So, in 2012, most returns were filed for deaths that occurred in 2011, for which the filing threshold was \$5 million. Because of filing extensions, however, some returns were filed in 2012 for deaths that occurred prior to 2011, for which filing thresholds were lower. The number of returns filed for deaths in 2010 was reduced by a provision in the tax law that enabled estates to opt out of the estate tax system and instead file Form 8939, Allocation of Increase in Basis for Property Acquired From a Decedent.

[2] Includes U.S. territories, U.S. citizens domiciled abroad, and a small number of returns for whom State of residence was unknown.

d = Data were deleted to prevent disclosure of individual taxpayer data. However, the data are included in the appropriate totals.

[1]Generally, an estate files a Federal estate tax return (Form 706) in the year after a decedent's death. However, the estate tax was repealed temporarily for 2010 before being reinstated with the passage of the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act in December 2010. The law, which was retroactive for all 2010 decedents, raised the estate tax exemption level to \$5.0 million and also allowed estates to opt out of the estate tax system and instead file Form 8939, Allocation of Increase in Basis for Property Acquired From a Decedent. These tax law changes, combined with extended filing deadlines for 2010 returns, resulted in relatively few estate tax returns being filed for 2010 decedents during 2011. Therefore, this table is not comparable to prior filing year estate tax tables.

[2] Includes U.S. territories, U.S. citizens domiciled abroad, and a small number of returns for whom State of residence was unknown.

NOTE: Detail may not add to total due to rounding.

\* Estimates should be used with caution because of the small number of sample returns on which they were based.

d = Data were deleted to prevent disclosure of individual taxpayer data. However, the data are included in the appropriate totals.

[1] The majority of estates file Federal estate tax returns (Form 706) in the year after a decedent's death. So, in 2008, most returns were filed for deaths that occurred in 2007, for which the filing threshold was \$2.0 million. Because of filing extensions, however, some returns were filed in 2008 for deaths that occurred prior to 2007, for which filing thresholds may have been lower.

[2] Includes U.S. territories, U.S. citizens domiciled abroad, and a small number of returns for whom State of residence was unknown.

NOTE: Not all states are shown.

\* Estimates should be used with caution because of the small number of sample returns on which they were based.

d = Data were deleted to prevent disclosure of individual taxpayer data. However, the data are included in the appropriate totals.

[1] The majority of estates file Federal estate tax returns in the year after a decedent's death. So, in 2006, most returns were filed for deaths that occurred in 2005, for which the filing threshold was \$1.5 million. Because of filing extensions, however, some returns were filed in 2006 for deaths that occurred prior to 2005. In 2006, the estate tax filing threshold increased to \$2.0 million.

[2] Gross estate is shown at the value used to determine estate tax liability. The value could be determined as of the decedent's date of death or 6 months thereafter (i.e., alternate valuation method).

[3] For deaths that occurred prior to 2005, a state death tax credit was available instead of a state death tax deduction.

For filing year 2006, there were 3,274 estates that used the state death tax credit, which totaled \$261.6 million.

NOTE: Detail may not add to total because of rounding.

\* Estimates should be used with caution because of the small number of sample returns on which they were based.

[1] The majority of estates file Federal estate tax returns in the year after a decedent's death. So, in 2005, most returns were filed for deaths that occurred in 2004, for which the filing threshold was \$1.5 million. Therefore, the threshold shown here is \$1.5 million. For deaths that occurred in 2005, the estate tax filing threshold was also \$1.5 million.

[2] Gross estate is shown at the value used to determine estate tax liability. The value could be determined as of the decedent's date of death or 6 months thereafter (i.e., alternate valuation method).

[3] For deaths that occurred in 2005, as well as in later years, a state death tax deduction replaces the state death tax credit. For filing year 2005, there were 673 estates that used the state death tax deduction, which totaled \$119.7 million.

[4] Includes U.S. territories, U.S. citizens domiciled abroad, and a small number of returns for whom State of residence was unknown.

\* Estimates should be used with caution because of the small number of sample returns on which they were based.

[1] Gross estate is shown at the value used to determine estate tax liability. The value could be determined as of the decedent's date of death or 6 months thereafter (i.e., alternate valuation method).

[2] Includes U.S. territories, U.S. citizens domiciled abroad and a small number of returns for whom state of residence was unknown.

Note: Detail may not add to totals because of rounding.
